XP1000 Brings more to your business

Trelleborg expertise in material handling applications has led to the development of the XP1000, specifically designed for maximum intensity applications.

The new product is the perfect tire for warehouse operations, port yards, shop floors and any material handling ground service, showing superior performance in terms of mileage, durability, fuel consumption, stability and comfort.

**EXTENDED

Superior performance for maximum intensity applications

The XP1000 gives maximum strength to maximum intensity applications. You can count on top performance at top speeds, heavy loads and long days.

INTENSITY VERY LOW

INTENSITY LOW

INTENSITY MEDIUM

INTENSITY HIGH

INTENSITY MAXIMUM

Next generation design

The XP1000 advanced treads are made with high performance compounds meaning long lasting life both indoors or out. In addition, it integrates the Pit Stop Line that lets you know with 100% accuracy when your tires need replacing.

- 1 Central wide contact area with circumferential rib profile minimizes vibration, enhancing handling performance indoors
- 2 Very deep lugs provide optimum traction for outdoor applications
- 3 Extra-deep tread profile maximizes service life
- 4 New concave sidewall shape guarantees optimum comfort
- 5 Protruding rim protector minimizes damage to wheels

Patented pattern design

Cutting edge technology for outstanding results

New tread pattern

Made up of high performance materials to provide an extremely long lifespan even with the most demanding applications.

Middle cushion layer

Makes sure internal tire temperatures are always under control, ensuring top performance also in extreme working conditions and absorbing road roughness, minimizing vibrations while maximizing operator comfort and safety.

Innovative fiber compound

More rigid than standard ones, it keeps a tighter grip on the rim, increasing vehicle stability even with heavy loads.

The right tire for your needs

Our unique labeling system helps customers find the perfect tire for their job at hand. Check out our Trelleborg tire reference labels by:

- Intensity
- Compound
- Pit Stop Line*

So you can determine the best fitting tire to meet the demands of your operations.

Available compounds

MULTI PURPOSE

Multipurpose: Premium compound with excellent wear and rolling resistance.

NON MARKING

Non marking: Premium white compound designed to keep floors free from tire marks. Excellent wear and rolling resistance. Exceptional heat dissipation.

ELECTRICALLY CONDUCTING

Electrically conducting: Specialized black compound to enhance safety in flammable and explosive environments. This compound discharges electricity and avoids spark generation.

PRO HD

ProHD: Specialized compound for heavy duty applications. Provides higher load carrying capacity. Uptime at its best.

PRO TEX

ProTex: Unique non-marking compound that features electrically conducting properties.

PRO ENERGY

ProEnergy: Cool running compound specifically designed for operations running long distances at constantly high speeds. It also features lower battery consumption for electric forklifts.

HEAT SHIELD

Heatshield: Flame retardant super premium compound designed to withstand the high ambient temperatures.

* where available

More sustainable than ever

The innovative fiber compound is made with recycled materials, our exclusive Pit Stop Line minimizes waste while the advanced tire design provides top performance even with reduced weight. This means huge savings in materials and deep reduction in CO2 emissions.

Maximum value for your operations

With XP1000 you can lower your costs while increasing at the maximum level the efficiency of your machines. It is made to last longer than competitors, which means a lower cost per hour of operation over its lifespan. The advanced construction and compound formula provides a very low rolling resistance for extra battery power for electric forklifts and reduces fuel consumption for internal combustion trucks.

Reliability and safety at their best

The new XP1000 aims to provide maximum reliability and safety for machine operators.

Extensive research and development when it comes to employing new materials assure tire reliability is strong, preventing heat generation during prolonged use. It delivers 21% higher temperature resistance than competitors' brands even under maximum intensity applications and a comfort level 13% above other premium players.

Longer running times, greater life span, less waste mean a drive toward efficiency, sustainability and the wellbeing of people worldwide.
